

Acts Retirement Health Services

We know quality health improves quality of life. So Acts Retirement offers a comprehensive range of senior health services that are truly life enhancing. Here's the best part: ***You don't have to currently be an Acts resident to take advantage of them!*** From assisted living and skilled care to rehabilitation, home health and hospice, these health services are now available to non-Acts residents, as well.* Acts even offers a [Nurse Practitioner Program](#) in some of its communities. We can help maintain your health and independence, which increases peace of mind for you and your loved ones.

Our residents have a say in how they receive long-term care. We call it our *Acts*

Signature Care experience. You'll call it a blessing. We give you and your loved ones the freedom to participate fully in care decisions. This adds a lot to overall peace of mind.

Our [**OakBridge Terrace Assisted Living Residences**](#) and [**WillowBrooke Court Skilled Care Centers**](#) provide more personalized care and flexibility than other facilities that deliver care at predetermined schedules.

Our highly trained retirement health services staff invites you to help decide mealtimes, bedtimes and wake-up times. You can choose bathing days and times. You can arrange to have medications dispensed according to daily routines.

Such freedom is very comforting. So is knowing we provide the finest health care equipment and technologies available. And that our spacious setting is designed to be relaxing, inviting and homelike. Our living rooms and recreation areas encourage socialization. Plus, we serve meals in lovely dining rooms, not on bedside trays. We know giving you more choices and more input gives you or your loved one more ways to stay engaged, healthy and happy.

Three additional person-centered health services at our Acts life care retirement communities provide rehabilitation care, home health care, and end-of-life comfort. With [**Acts Signature Rehabilitation**](#), we tailor programs to help residents regain health and function, in both short-term stay or outpatient settings. Our [**Acts Home Health**](#) caregivers help seniors maintain their independence in familiar surroundings for as long as possible. [**Acts Signature Hospice**](#) offers physical, spiritual and emotional comfort and care for those with terminal illnesses, their families and caregivers.

* Services and availability may vary from community to community. Please speak to a [**community Life Care Consultant**](#) or representative for details.
